The 'reasonable' weight capacity expectations for the following have been obtained from consultation with industry experts and are a guideline only.

- 1490 span of 16mm thick melamine board is 2.3kg's per 300mm span
- 1450 span of 30mm x 15mm oval aluminium rod is 1.6kg's per 100mm span

Spans of 1500mm or more require extra support and further extra support every subsequent 1200mm thereafter.
